Omar Naceur

AI Engineering Student | Agentic AI & LLM Systems | Computer Vision

omar.naceur01@gmail.com · +216 20 888 207 · Souassi, Mahdia, Tunisia
github.com/Omar Naceur2001 · linkedin.com/in/omar-naceur

Engineering student specializing in Data Science & AI at **ESPRIT (Monastir)**, focused on agentic AI systems, computer vision, and real-time intelligent applications. Currently building Agentic-SDLC, a multi-agent pipeline that automates software delivery from Jira ticket to deployed application. Strong analytical foundation from competitive preparatory classes ; active member of AIESEC and the Aerospace Club.

EXPERIENCE

Software Engineering Intern *Jul 2026 – Present*
Microedition Monastir, Tunisia
Data Science & AI

— Participated in rigorous code reviews and technical discussions, ensuring optimal code quality, scalability, and adherence to AI engineering best practices.
— Collaborated closely with cross-functional teams using agile methodologies to bridge the gap between intelligent data models and production-ready applications.

PROJECTS

Agentic-SDLC *Autonomous Multi-Agent Software Delivery Pipeline*
Python, FastAPI, Groq (Llama 3.3), GitHub API, Playwright

— Architected a multi-agent system (Planner → Code Agent → Deploy Agent) that autonomously converts Jira tickets into deployed, live web pages.

Medical AI Diagnostic Platform *Computer Vision & Explainable AI*
Python, TensorFlow, FastAPI, Streamlit, EfficientNetB0

— Built a full-stack diagnostic platform for brain MRI tumor and chest CT lung cancer classification, featuring Grad-CAM explainability and autoencoder-based anomaly detection.

ECG Classification AI *Deep Learning for Medical Signals*
Python, TensorFlow, ResNet-50

— Developed a deep learning model to classify ECG signals using a ResNet-50 architecture on complex medical time-series data.

EDUCATION

Engineering Degree, Data Science & Artificial Intelligence *2024 – Present*
ESPRIT, Monastir, Tunisia

Integrated Preparatory Cycle in Engineering *2022 – 2024*
Classes Préparatoires, Gafsa, Tunisia

TECHNICAL SKILLS

— **AI / ML :** Deep Learning, Computer Vision, LLMs, Agentic AI Systems, Prompt Engineering
— **Frameworks :** TensorFlow, Scikit-learn, FastAPI, MediaPipe, OpenCV
— **Data :** Python, Pandas, NumPy, SQL, Power BI
— **Tools & APIs :** Groq API, GitHub API, Playwright, Git

CERTIFICATIONS & LANGUAGES

Certifications :

— **Fundamentals of Deep Learning** – NVIDIA *Feb 2026*
— **Introduction to Data Science** – 365 Data Science *2025*

Languages : Arabic (Native) · French (B1) · English (A2)
